

Oosha named top
Managed Service
Provider for 2022

Oosha named top Managed Service Provider for 2022

A Managed Service Provider is a vital ingredient when trying to operate a successful business. They also play a key role in turning IT into a distinctive advantage without straining budgets. It is for this reason that every year Cloudtango honours the most successful MSPs across the United Kingdom in what has become an industry reference due to its independent, unbiased approach, as well as in-depth analysis.

In this eighth edition, MSP Select UK continues to highlight technical excellence, innovation, and customer satisfaction provided by the MSP industry. For 2022, the technical analysis focused on cybersecurity, support, infrastructure, and cloud services.

"Through the selection process, we have reviewed 223 different types of certifications, case studies, endorsements, and up to eight years of data. With the world becoming more digital, a high standard of IT services is ever more critical for businesses to stay competitive. With this in mind, we selected Oosha due to its strong commitment to excellence and customer satisfaction" said Jordi Vilanova, Managing Director at Cloudtango.

MSP Select UK does also underline those MSPs who play key roles in helping customers drive innovation. By being selected, Oosha demonstrated a track record of successfully delivering innovative IT solutions while exceeding customer expectations.

Oosha co-founder, now Commercial Director at Access Legal, commented "Joining The Access Group's legal division last June has enabled Oosha to grow on the success of our previous 13 years. Combining with the brightest minds within Access Legal accelerated our plans to provide the best legal technology solutions to the UK market."

About Oosha

We're Oosha - the leading provider of Cloud & Managed IT Services to the UK legal sector.

Working with mid-tier, top 100 and regional firms across the UK, we believe that the IT experience for lawyers should be as seamless as the experience we all have when using technology in our personal lives.

With this in mind, our aim is to give law firms the platform to work productively and securely, from anywhere at any time so you never miss a billable hour again.
