

Innovative MPS solutions for your business

The MPS Team
From solutions to software

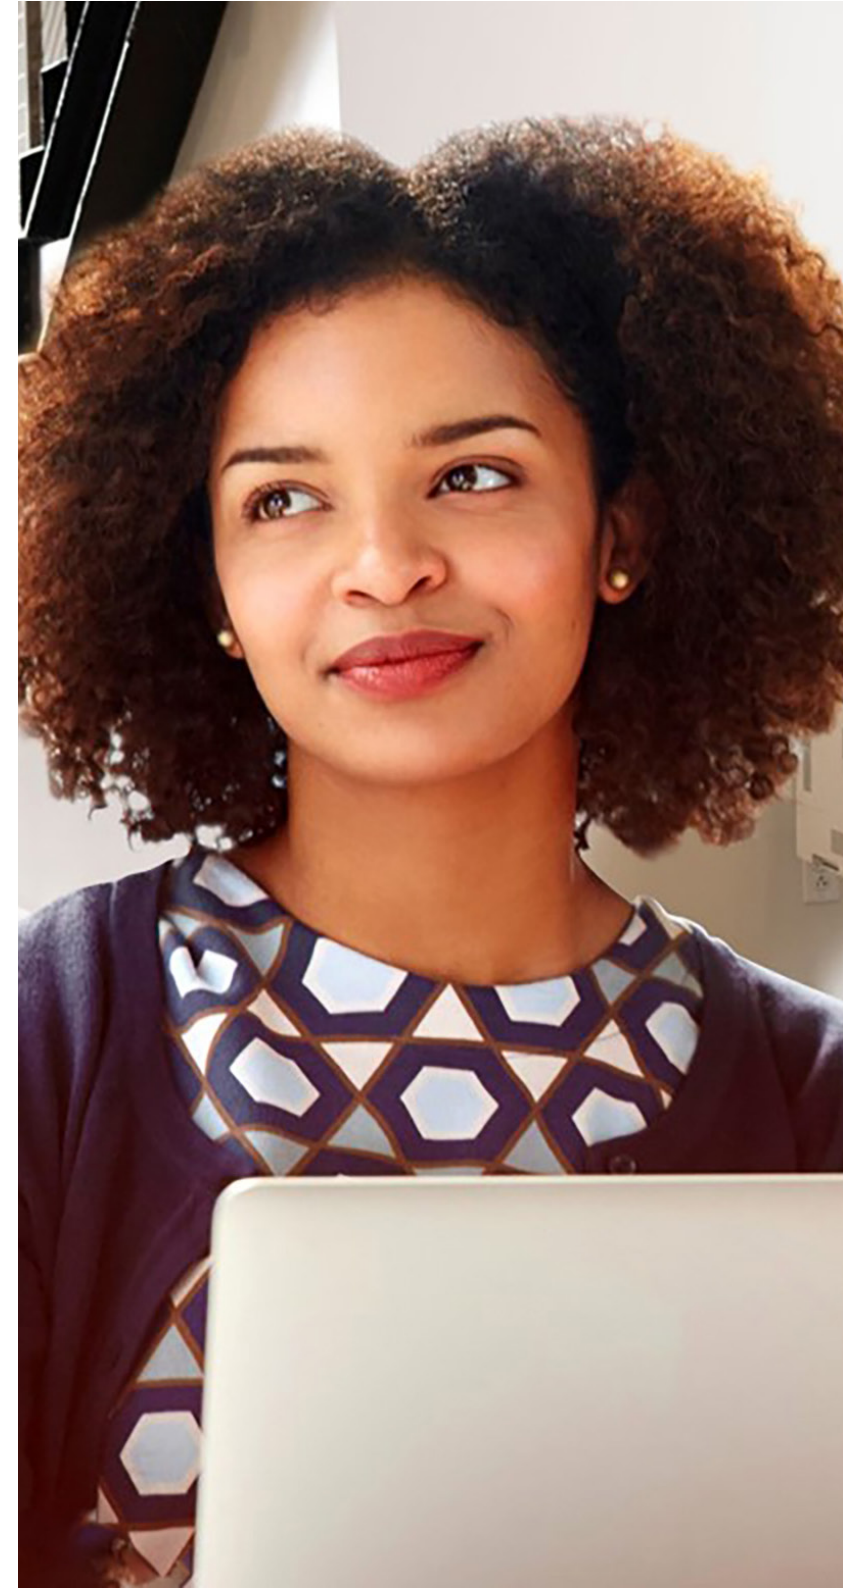

Introducing The MPS Team

The MPS Team is a specialist division of ZenOffice, sister company to OfficeTeam and part of Paragon Group.

We're experts in creating bespoke, innovative managed print solutions which help businesses of all sizes get the most out of their document-centric processes.

Utilising the latest software and technology, our team of experts can tailor you an MPS concept seamlessly integrated with your infrastructure that will provide efficiencies, improve collaboration and increase productivity with security, sustainability, and service at the heart of what we do.

The MPS Team is a Canon Silver Partner, a HP Amplify Power Services Partner and one of only a select few Xerox Platinum Partners.

The MPS Team's solutions enable you to;

- Access, edit and share files, archives and folders securely and remotely.
- Automate document routing, including automation of invoice processing, data extraction and digital mailroom automation.
- Enable your teams to communicate seamlessly with each other, wherever they are.
- Combine, edit, and scan paper to PDF and create searchable PDF files.
- Take control and manage your printer fleet efficiently with high levels of performance metrics, consolidated fleet reporting and accounting integration.
- Reduce your carbon footprint and boost your organisation's CSR.

Security

With the increase in employees moving between the home and office, devices not secured within your company's framework are easy targets for hackers to gain access to your network and sensitive data.

We'll provide exactly the levels of security that you need, with solutions ranging from controlling access to each device right through to a fully secure document infrastructure, complete with a detailed audit trail.

Sustainability

The more you print, the more trees we plant. Committed to helping businesses reduce their carbon footprint, we partner with PrintReleaf so your paper consumption can directly contribute to reforestation projects around the world, at sites of your choosing.

To date, we have offset over 2 million pages and planted over 250 trees. Track our progress [here](#).

Service

The MPS Team's Post-Sales Technical Support is market-leading. With a dedicated software support help desk and customer facing support portal, our Technical Consultants offer first class technical support remote or onsite to the highest standard.

Our dedicated Managed Services team can help you significantly reduce your service costs, maximise device uptime, and deliver an exceptional service experience.

The MPS Team, part of Paragon Group

The MPS Team is a specialist division of ZenOffice, part of Paragon Group. We're experts in creating bespoke managed print solutions which reflect each of our customers' operational and financial requirements. We're a Canon Silver Partner, a HP Amplify Power Services Partner and one of only a select few Xerox Platinum Partners.

ZenOffice, and The MPS Team, became part of the Paragon Group in July 2020. Paragon Group is an international organisation present in over 20 countries with a global sales reach, €1.214 billion turnover and more than 9,000 employees. The new partnership provides industry-leading MPS solutions and software to a wide-ranging customer base across the UK, Europe and beyond.
